Water Soluble CBD Supplement

One Shot is an all-natural solution to infuse any hot or cold drink with the power of CBD

Developed specifically for coffee shops, bars, bakeries, and the hospitality industry, to take advantage of the growing consumer interest in CBD led food and beverages.
CBD One Shot lets you turn drinks into CBD-infused drinks by simply adding a dose while it's being made (1 pump= around 2MG of highly absorbent CBD).
That means customers can add CBD to their favourite soft drink one day, add a shot to a breakfast smoothie the next, and start off their morning with a CBD coffee the following day - perfect if you want some variety on your menu!

CBD One Shot is designed for maximum absorption – meaning users feel the benefits, faster. With a bioavailabity of over 90%, CBD one shot trumps any under-the-tongue CBD oil, which only has 10-12%.
